Domain Score

2

This metric measures the importance of a domain using a 100-point scale (from 0 to 100) and is based on the quality and volume of links pointing to this domain. The higher the score, the higher the quality of the domain. Domain Score is calculated in the same way as Google's PageRank.

Trust Score

0

This metric measures the trustworthiness of a particular domain using a 100-point scale (with '0' indicating a low-trust site and '100' indicating a highly trusted site) and is based on the number of backlinks from trusted sites pointing to the domain. If a site's Trust Score is significantly lower than its Domain Score, this may be a sign that the latter was artificially inflated. Backlinks from such sites may trigger Google penalties.
